AARON & COMPANY MVP 2002 PROGRAM WINS WIT MARKETING PROGRAM OF THE YEAR

At the annual WIT Stockholders and Marketing meeting in Denver Co. in September 2002 Aaron & Company was honored by the WIT Marketing Department with the award for *Marketing Program of the Year* for the MVP 2002 Customer Loyalty Program. Aaron & Company received top Marketing honors out of more than 70 other Distributors from around the nation for our Customer Loyalty Program.

WIT is a buying group consisting of over 70 Independent Plumbing, Heating, and Air Conditioning Distributors with over 400 locations nationwide. The group is member owned, and has aggregate sales in excess of \$1.7 Billion. The Purchasing power of this united group and the Marketing services and support they provide to Manufactures in the PHC industry makes WIT a powerful organization ready to grow in the ever-changing wholesale distribution business.

Aaron & Company has been a proud member of WIT since 1999. Our membership in WIT affords us the buying power to compete with any of the national chain distributors while still offering the superior service and dedication to our local markets as only an independent

family owned business could. WIT improves our present situation and secures our future as a thriving Independent Distributor that's entire business hinges on the support of the local trade. The MVP 2003 and the A-TEAM CONTRACTOR Customer Loyalty Programs are designed to reward our loyal trade customers for all their purchases for 2003.

The MVP 2003 Program rewards Aaron & Company customers with points redeemable for great gifts and trips. The Aaron A-TEAM CONTRACTOR Program rewards loyal contractors with special A-TEAM CONTRACTOR apparel. To find out more about the MVP 2003 Program or the new Aaron A-Team Contractor Customer Loyalty Program contact your Aaron & Company Sales Representative or Kevin Manning @ 1-800-227-6677.

INSTALL YOUR NEXT SINK IN HALF THE TIME WITH ELKAY

Elkay knows that time is money in the contracting business. That's why they now offer the Quick-Clip top install system on many of their Stainless Steel Sinks. It's easier, faster and secures better than any other mounting system on the market. Quick-Clip provides a snug, gap-free fit that is easily adjustable on site. The unique ratchet design clip system locks the sink in place, and allows you to compensate for warps or imperfections in the countertop by simply applying pressure to the sink edge. Best of all, it's designed to allow up to 1/2" variation in the cut out opening so a small mistake doesn't create a big head ache.

Think Fast!
Now Think Faster.

Elkay® sinks with the Quick-Clip™ top install system, ideal for multiple drop-in sink installations.

SKUTTLE HAS THE HUMIDIFIER FOR TODAY'S HIGH - EFFICIENCY HEATING SYSTEMS

Today's heating systems that operate at 90% + AFUE with variable speed blowers and utilize set - back thermostats are truly the most efficient warm air systems available. But, all warm air systems need additional humidity for the comfort of the family and the protection of the wood furnishings in the home. The High -Efficiency heating systems do not operate in long enough stretches or generate the high-level temperatures necessary for evaporative type humidifiers to work as efficiently and effectively as a Skuttle Model 60 High Capacity Steam Power Humidifier.

Model 60 Series

High-Capacity Steam Power Humidifiers
Excellent choice for heat pumps and high-efficiency heating systems

Features

- Thermal fan interlock control allows unit to humidify air without heat from furnace.
- Compact size ideal where space is at a premium.
- Cleaning is made easy with a one-piece service drain petcock.
- Corrosion resistant low water safety cut-off switch and built-in overflow protection.
- Uses minimum water.
- Does not contaminate heated air.

FAQ's & USEFUL INFORMATION

Q. What is the proper way to size a boiler for a Steam Boiler change out?

A. Steam Boiler sizing must be done by measuring the radiator heights, and counting the number of sections of tubes or columns for each radiator. With this information, you could calculate the square feet of steam per radiator. Add together the calculations of square feet of steam and refer to the literature for boiler sizing provided to you by your Aaron & Company Sales Representative. Under the column for square feet of steam, find the closest figure to your needs, which is not less than your requirement. In most cases you will be between two sizes. ALWAYS choose the larger size. You may never choose a boiler with less square feet of steam than what is required by the total heating system. As a note, normal piping loss is already calculated.

Burnham brings today's tip to you.
